Transformation at Par !

Creating Solutions for Pre-Engineered Building Structures !

An ISO 9001 : 2015 & ISO 14001 : 2015 Company

The world is designed implementing various engineering skills. Big or small, it is those little bricks or steels that builds up massive buildings . Latest technologies have also established its roots in these fields and consequently are in great demand.

Engineering is directing the great sources of power in nature for the use and convenience of man

- Thomas Tredgold.

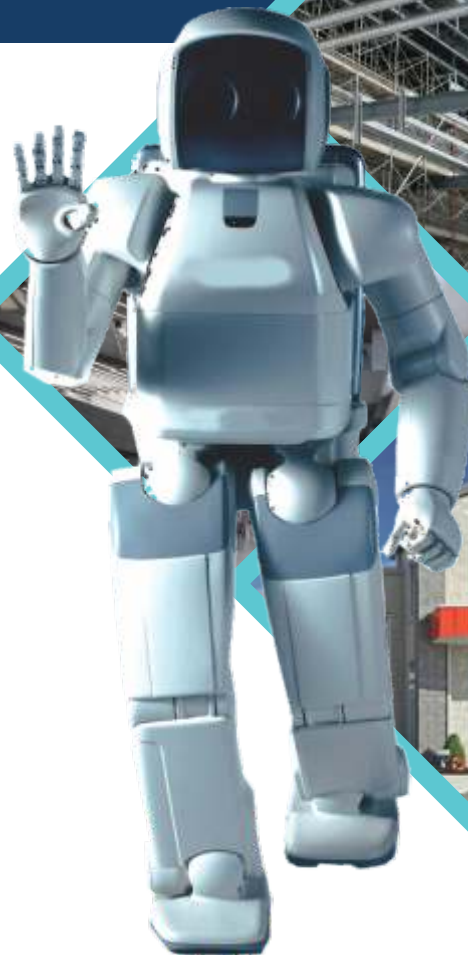

About us :

The Surabhi Infra Projects (India) LLP is a gen-next steel infrastructure solutions company that caters to the global need of next-gen Pre-Engineered Buildings (PEB), Roofing solutions and Structural (Engineering)

Surabhi Infra Projects (India) LLP is an esteemed group that matches up with the latest trends and technologies and engineers the ultimate Pre-Engineered Buildings (PEB) and Structural Steel to fulfil every small and big needs of the customer

Surabhi Infra Projects (India) LLP are reputable manufacturers and suppliers of a diverse range of products. In order to keep up with the customer's expectation and continue to hold high reputation, manufacturing of the products is done in accordance to industrial norms and guidelines by utilizing the finest raw materials.

Surabhi Infra Projects (India) LLP owes to never compromise with quality. Hence the standard of quality, sturdiness, durability and finishing of the product is most eminent.. Commendable packaging, reasonable pricing and punctual

delivery increases the demand of the products which motivates the manufactures to deliver quality services to the customers.

Surabhi Infra Projects (India) LLP aims to be the best among the rest of its competitors in the production of beneficial and suitable construction equipments. Surabhi Infra Projects (India) LLP ensures that the products and services will be rendered to the customer with utmost care and responsibility which will in return reward an everlasting clientele relationship for business and its aspects.

Our Mission :

The Surabhi Infra Projects (India) LLP will achieve this vision by consistently delivering high-quality products to our customers, accompanied by personalized service and a commitment to excellence.

Our Vision :

To be recognized as the global leader for the design, manufacture, supply and erection of Pre-Engineered Steel Buildings (PEB) and Structures.

We Offer the Complete Solution :

Design :

The state of the art Designing facility with innovative forms of pre-build structures.

Production and Facilities :

The cutting edge technology to shape up the structure more precisely and in a topmost quality, because, Surabhi believes in the excellence.

Erection & installation : SAFETY FIRST

A team of experienced engineers and skilled technicians ensures the timely, safe & error-free erection of your Projects within specified budget.

Logistics and shipping :

Our dedicated logistics and shipping team is equipped with the best resources and ensures that all project material is delivered on time and in the most efficient manner.

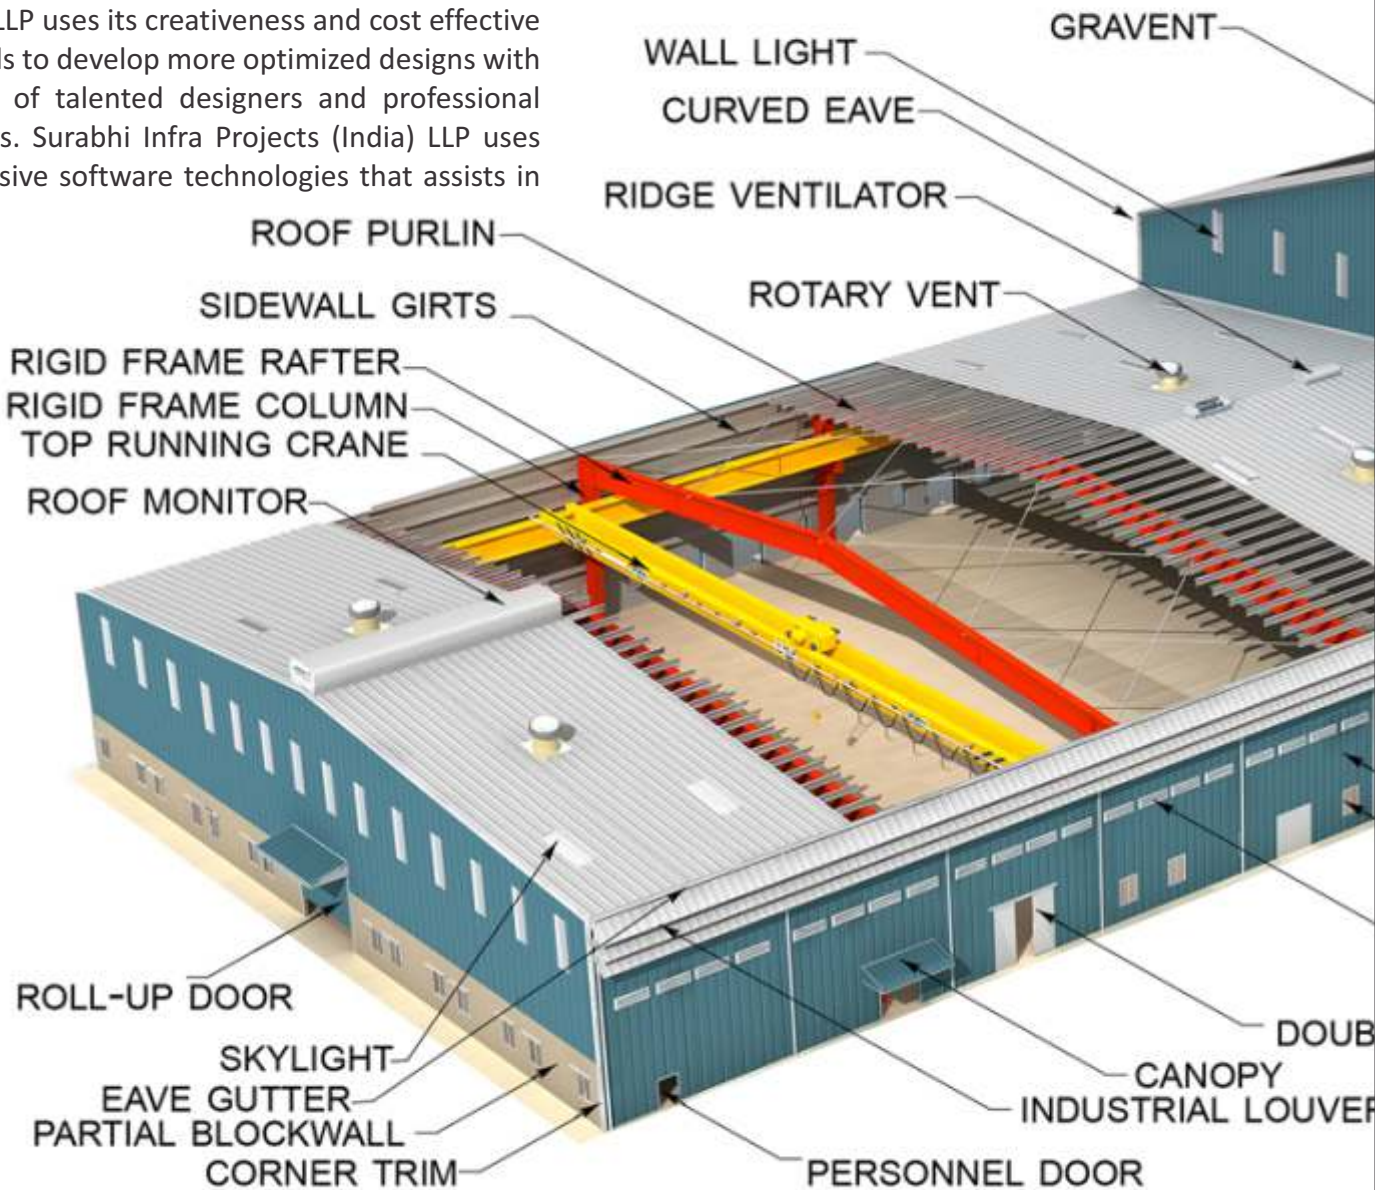

After sales service :

Surabhi assures you the best PEB through continual development, adherence to material standards, advanced manufacturing techniques, superior quality and onsite precision. Our team will support you by offering quality and punctual after sales service.

Design

Designing is the basic step to build any infrastructure. Design wholly explains every minute detail of the project. Surabhi Infra Projects (India) LLP uses its creativeness and cost effective methods to develop more optimized designs with a team of talented designers and professional detailers. Surabhi Infra Projects (India) LLP uses progressive software technologies that assists in

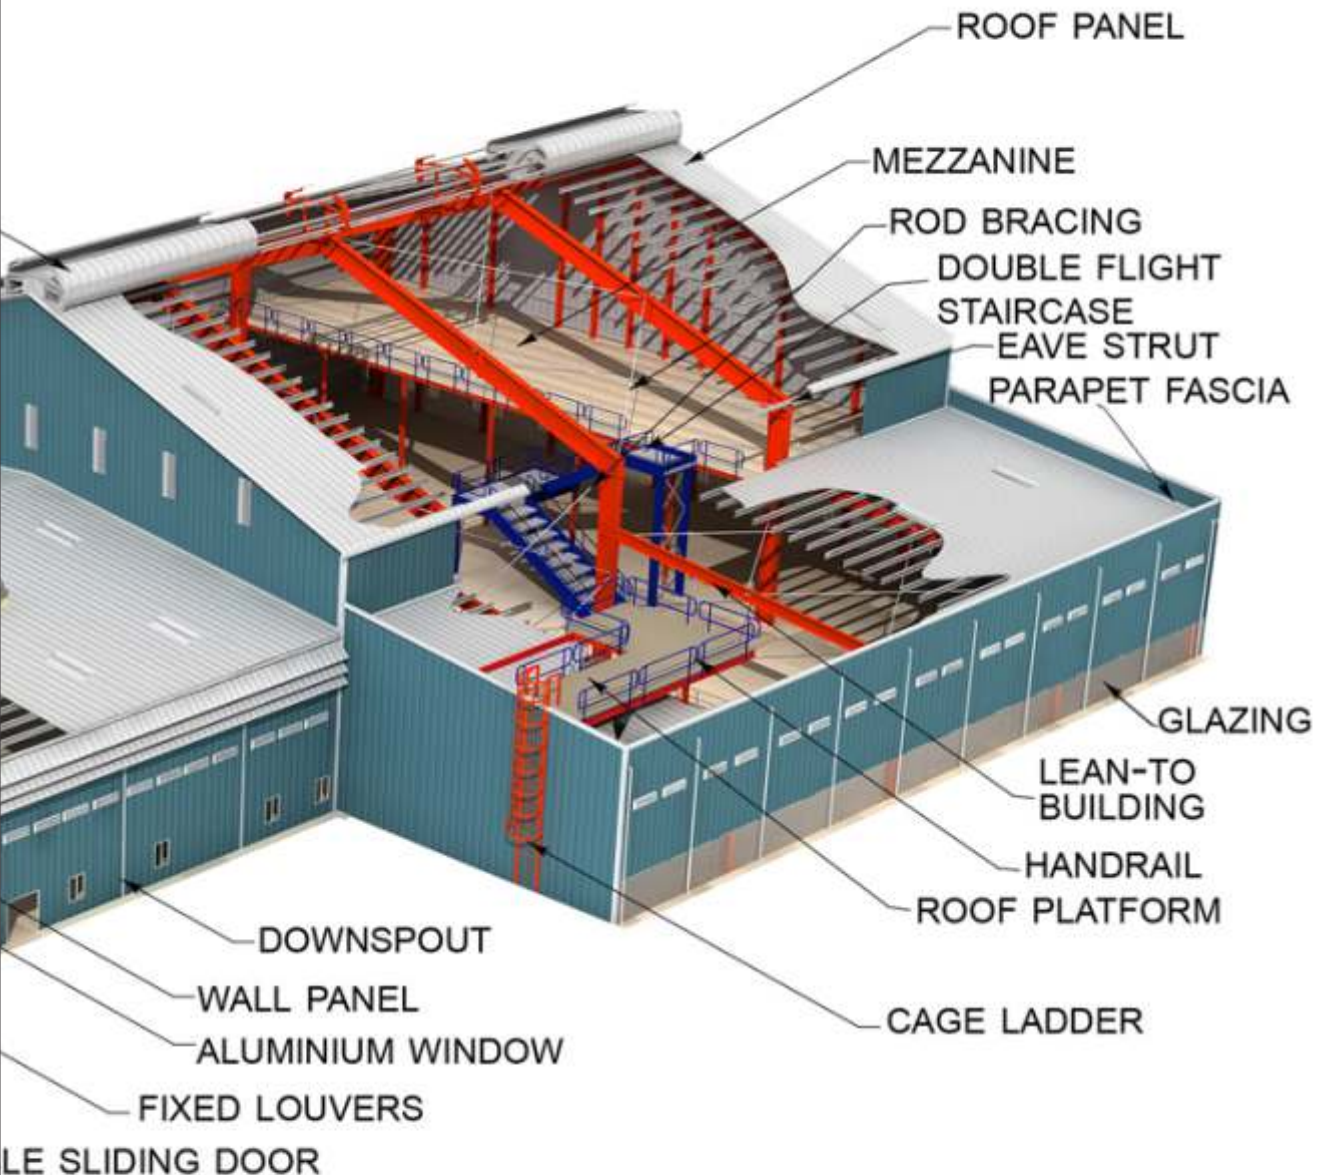

precise design solutions and also provides utmost support from the very start of the designs till its installation.

Computerized design allows buildings to be costumed according to the individuals prerequisites. The buildings are designed or pre engineered to enable easy production and assembly on site. The use of newest technologies and software for designing and detailing engineering makes Surabhi Infra Projects (India) LLP leading PEB manufacturers.

Production & facilities :

- PEB
- Structural Steel
- Quality Control
- PEB

The art of engineering lies in its forms & mesmerizing structures. Pre engineered building is the result of one such innovational art which is an artistic creation built over a constructive idea that connects primary member's secondary member's roof and wall sheeting to each other.

The structural system includes consists rigid frames that are fashioned from plate steel and cold formed into an "I" shape through a constructing process to meet up or match up with the desired locations as per the requisites.

PEB is incomparable in its swiftness & asset to fit into the specific needs. It is also regarded as fire proof and equipment that is quite easy to install within minimum time span and money. The fundamental concept of PEB involves steel building systems which are pre planned, designed and fabricated which ultimately increases its demand in economical construction. PEB is a metal building that consists of light gauge metal standing seam roof panels on steel purlins spanning between rigid frames with light gauge metal wall

cladding. PEB are also light in weight hence eases out the trouble of installation and re installation which in return makes it advantageous over conventional steel building which has high strength per unit mass.

PEB has also gained its reputation for durability in utmost weather conditions such as earthquakes, rains etc. They proved to be easy to set up, expand according to the changing requisites, modify as well as transport to different locations far and near. It also saves time and money as no welding or fabrication is required. PEB is indisputably the latest as well as a unique technique thought over CSB.

	SURABHI PRE ENGINEERED BUILDING	CONVENTIONAL STEEL BUILDING
Design	Quick & efficient, Light weight, Cost effective	Heavy weight, High practice, Time taking & Expensive
Architecture	Outstanding architectural design for contractors & clients with hassle free data	Special architectural features & design requires research which results in higher cost
Foundation	Light weight, hassle free design, easy to erection	Heavy weight, special design, hard to erection
Erection	PEB concept saves upto 30% cost than CSB	CSB concept upto 30% more expensive than PEB
Future expansion	It is very easy to expand or change the PEB design in future at very low cost	It is very difficult & expensive
Responsibility	Single responsibility for design, supply, erection etc	Multiple responsibility from start to end project work
Maintenance	Very low maintenance as much as to zero	Heavy maintenance
Practice	Applicable for Commercial, Industrial & Infrastructure sector	Preferred in heavy industries
Time of work	Very less time to complete the project	More time to complete the project
Quality & wastage	All work is factory controlled environment leading to uniform quality & minimum wastage	All the time quality issues, maintenance & high wastage
Work limitations	No need of any machinery work at project site like welding, cutting, bending etc	All the machinery work done at project site so it is inconvenient for us & client also

Our Manufacturing Features :

Factory and Industrial Buildings

Airport Hangers

Metro Stations

Bridges

Commercial Buildings

Warehouses

Restaurant

Hospital

■ Structural Steel

Structural steel can be broadly categorized as a type of construction material for making a vivid kind of constructional steel shapes. Steel has its many uses in the modernized world and is mainly appreciated in the construction sites or fields. Steel is a crucial material used in construction of building due to its strength, adaptability, sustainability, availability and also its low cost. Steel can be moulded and bend into different desired shapes as per the requisites and hence is pronounced as structurally sound material used in construction. Iron is the major constituent in the composition of steel. Steel is also a beautiful element that is used by many architects and hence there is a great demand for them.

■ Quality Control

Any business or products has its demand in the market with respect to its quality. Quality plays a vital role in enhancing business standards. It becomes essential to meet the quality norms along with all specific standards

Surabhi Infra Projects (India) LLP is an ISO 9001,2015 and ISO 14001,2015 certified organization with a comprehensive licensed testing facility that scrutinizes all the raw materials along with finished products. Surabhi Infra Projects undertakes extensive projects and reassures timely delivery without undermining its superior quality and productive efficiency.

“Quality is the best business plan”
-John Lasseter, Pixar

Surabhi Infra Projects (India) LLP works wholly with an aim of giving the best to the customers so as to maintain contended relationship with each of their respective clients.

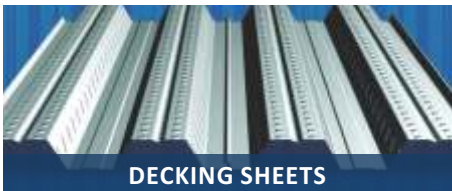

Industrial Engineering :

It is a category of metal fabrication covering the manufacturing of processing & support equipment for industrial use . It is supported by qualified engineers & technical staff having ability to execute with immense expertise to work under the ever changing demands of the industry offcourse without compromising Quality !

Roofing Solutions :

We provide roofing solutions for Factory, Industrial Warehouses, Airport Hangers, Metro Stations, Commercial Buildings, Restaurant, Hospitals. We assure you wide range of designs, sizes, colours and accessories to choose from and with high quality, durable material and impeccable service.

DECKING SHEETS
